

PRODUCT INFORMATION

Catalog No.: H RPM201-50, 201-250

Product Name: **Protein Marker: Unstained, High Range**

Description: The High Range Protein Marker is a mixture of purified proteins of known molecular weights used as standards in determining the molecular weight of unknown proteins run on SDS-polyacrylamide gel electrophoresis (SDS-PAGE). The High Range marker displays 5 protein bands from 45-212Kda, and is useful on acrylamide gels of varying concentrations.

Tech Note: The marker is in a ready-to-use format and can be loaded directly into the designated lane(s) for the protein standard. However, it can be diluted into the same buffer used for sample preparation. This protein marker mixture is made in such a way that it will yield protein bands of clear intensity when stained, using standard Coomassie Brilliant Blue staining procedures.

	MW (KDa)
Myosin	212
β -Galactosidase	120
Phosphorylase B	97.4
Bovine Serum Albumin	66.2
Ovalbumin	45
Package Size	50 Loadings, 5X50 Loadings
Recommended gel conc.	6-10%
Storage	-20oC

	Size	Catalog No.
Protein Markers:	50 Loadings	HRPM201-50
Unstained, High Range	250 Loadings	HRP201-250
